ABOUT ME

passionate software developer, project creator and lifelong learner. I'm currently growing my expertise in React and TypeScript, building projects that are dynamic, scalable, and impactful. Before transitioning to React, I spent 2 years developing with Vue.js, crafting intuitive interfaces and enhancing user experiences. In my free time, I love playing video games, walking outside, listening to music and talking to friends.

PERSONAL PROJECTS

Portfolio

showcasing projects, skills, and creativity.
Preview Source Code

Feelink

minimalist social platform designed for seamless interactions. Users can create and share posts, explore content, and connect with others through a simple yet engaging interface. The platform includes authentication, media uploads, and GIF integration.
